

CASE #1 - International Manufacturer of Fuel Systems

| Managing calibration service needs |

#Challenge

Full **outsourcing** of calibration services (electrical, temperature, pressure, and flow measurement as well as force, accelerometry and mechanical).

The objective is to:

- > ensure measurement quality and
- > responsiveness in conducting tests

#Solution

Trescal carried out an audit of the customer's calibration activities.

Trescal **set up on-site service campaigns** for all of the measurements.

Trescal **deployed its calibration asset management software** to track customer measurement instruments in real time and generated cost savings.

#Summary

on-site service campaigns

cost savings
